

How to use Lepida's SPID

1 Now I have SPID: how can I use it?

With SPID you can access public administration's online services and you can consult your data:

- Health record
- Isee
- Doctor change
- Payments
-

What do I need?

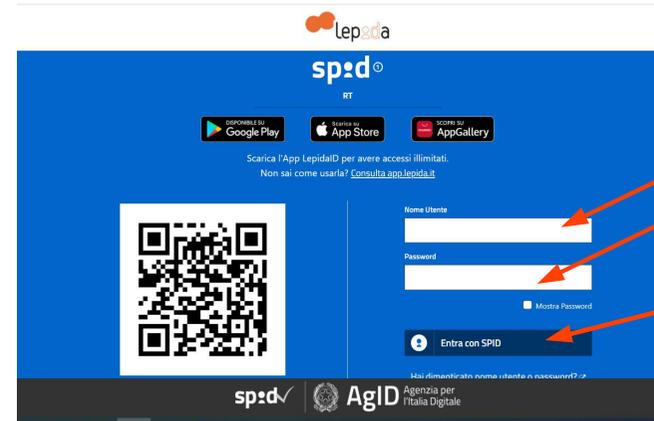

Username – your personal e-mail address that you provided when the SPID credentials were requested. (For example name.surname@gmail.com)

Password – the key word that was chosen when the SPID credentials were requested.

LepidaID App – Lepida's app for smartphones: <https://app.lepida.it/> The app allows to generate the OTP code or to scan the QR code, to access the online services.

3

Method 1

Fill in the fields "Nome Utente" (Username) and "Password"

Click on "Entra con SPID" (login with SPID)

2 What do I do?

When you have chosen the service you want to access you have to select "Entra con SPID" (login with SPID) as authentication method:

Then select the provider Lepida.

4

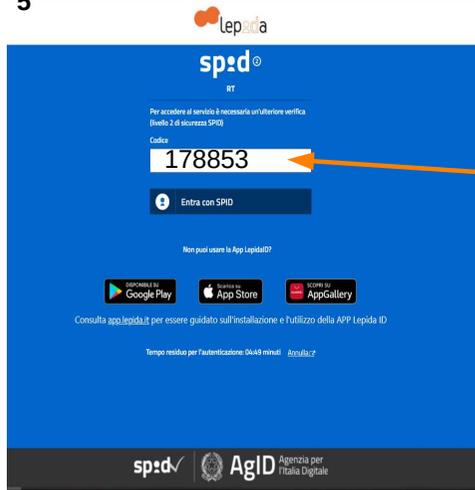

Method 1

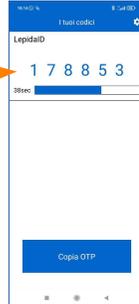

Select the option "inserimento di un codice temporaneo (OTP) generato dall'app" (inserting a temporary code (OTP) generated by the app), and use LepidaID's app to get the OTP code.

5

Method 1
Insert the OTP code generated by the app in the requested field.

7

Method 2
If login is successful a green border will appear around the QR code on the service page.

6

Method 2
Use the LepidaID app to frame and scan the QR code on the service page, then follow the instructions on the app.

8

With both methods you arrive to a page where you have to authorise the service provider to access some of your information by clicking on "Autorizzo" (authorise).
You should now be able to access the chosen service.
